Guidelines

in epidemiology, 166-171

H

HDL cholesterol

fibrinogen levels and

association with cardiovascular disease, 369-374

Health surveys

cluster. *See also* Cluster surveys

for children's vaccination schedule in developing countries, 302-311

recruitment strategies

effect on response rates, 321-326

response rate

effect of a monetary incentive on, in mail survey, 231-235

Hemostatic factors

related to risk of stroke and cardiovascular disease in elderly, 59-66

History. *see* Family historyHIV. *see* Human immunodeficiency virus

Homicide

against women, 133-139, 140-145

Hormone replacement therapy

effects on coronary heart disease

compliance bias and, 115-118

Human immunodeficiency virus (HIV). *see also* Acquired immunodeficiency syndrome

antibody to

syphilis seroreactivity and, 460-465

maturity of

incubation period of acquired immunodeficiency syndrome among injecting drug users related to, 17-26

seroconverters

CD4⁺ lymphocyte counts in, specific Western blot bands associated with, 27-31

surveillance

ethics related to, 159-165

transmission

among pregnant women, correlation with multiple sexual partners, 472-479

type 1

antibody status, association with changes in risk behavior among drug users, 466-471

wasting, early predictors of, 32-39

vaccines, 27-31

Hyperinsulinemia

as predictor of coronary heart disease, 40-45

Hypertension

in diabetes mellitus

risk of idiopathic dilated cardiomyopathy related to, 67-74

I

Immunization

for children

in developing countries, Expanded Programme on Immunization's cluster survey on, increasing accuracy of, 302-311

Immunology

antibody response to HIV, 27-31

Immunotherapy

human immunodeficiency virus, 27-31

Incubation period

of acquired immunodeficiency syndrome

maturity of human immunodeficiency virus among injecting drug users related to, 17-26

Infant. *See also* Birth weight

low birth weight, small for gestational weight, and premature

socioeconomic status related to, 271-278

Infertility

pelvic inflammatory disease-related, 128-132

Injuries. *see also* Violence

running-related, 375-381

to women

intentional and unintentional, 133-139

occupational, deaths related to, 146-151

Insulin

resistance

as predictor of coronary heart disease, 40-45

Ionizing radiation

exposure to

and risk of cutaneous malignant melanoma, 480-489

Ischemic heart disease

NHLBI Twin Study on

of 16-year incidence, classification of subjects into high- and low-risk groups, 198-204

K

Knee

osteoarthritis

physical activity as a risk factor for, 221-230

L

Langmuir, Alexander Duncan (1910-1933)

(obituary), 76

Leukocytes

peripheral blood

differential count, cigarette smoking effects on, 236-242

Life events

recall bias in disease status associated with, 393-397

Lipids

as cardiovascular risk factor

relationship with body fat distribution, in healthy Chinese, 434-444
